

KOOLGRIPS

JACK HANDLE COVERS

INSTALLATION

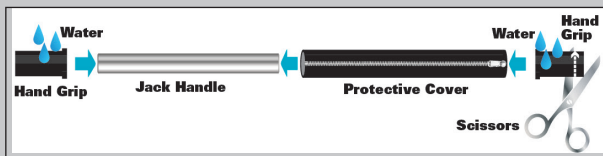

One-size-fits-all Protective Cover:

- **Hand Grip:** Install the hand grip first.

Note: Wetting the jack handle allows the hand grip to slide easily onto it.

- **Protective Cover:** Install the foam insert under the hand grip at the top of the handle, and clasp the zipper together. Continue zipping in the direction of the bottom of the floor jack until the foam insert is closed.

- **Bottom Grip:** Remove the handle from the jack. Wet the handle and slide up from the bottom of the handle to the bottom of the protective cover. Be sure there's enough space for the handle to fit onto the jack. If not, trim the grip with scissors in small increments to allow the grip length to fit.

MAINTENANCE

Clean soiled covers with a mild soap like DAWN dish detergent or Simple Green. Leave cover on or remove from the handle. Do not put in dryer. Do not use harsh solvent-type cleaners or protectants like Scotch-Guard or Armour-All to the covers.

WARRANTY

Our KoolGrips Jack Handle covers are warranted for one year from date of purchase from any manufacturers' defects. Using tools to zip covers on handles will void this warranty.
